Rhobus® Plus

The Latest Professional AV Corporate Communication Platform

Supporting the Industry's Demand for Enhanced Storage and Seamless Video Conference Integration

As AV technology continues to evolve, so to must the stands and trolleys that support them. The Rhobus Plus stand & trolley range was created to meet that demand, bridging the practicality of the Rhobus range with the premium functionality of the Summit series.

Whether deployed in boardrooms, control centres, collab zones or modern learning environments, this versatile trolley enhances AV in any space.

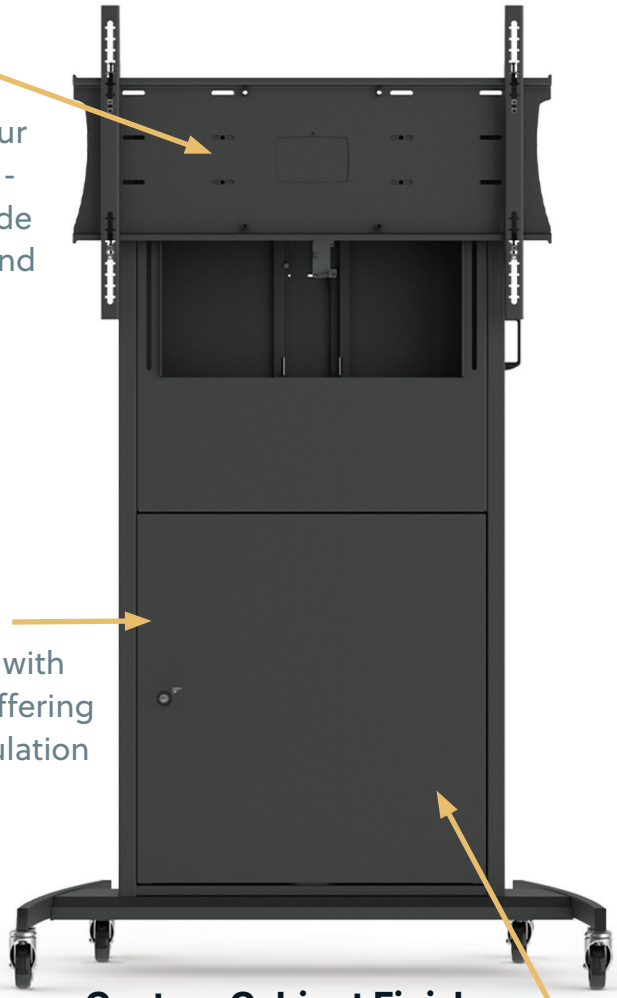
Image shows Rhobus Plus Heavy Duty Trolley with PZX9 Universal Mount and Slatted Oak Cabinet Door

Universal Screen Mount.

Each Rhobus Plus unit is supplied with one of our universal screen mounts - offering suitability for wide ranging VESA patterns and 55-98" displays.

Lockable AV Equipment Storage.

Secure, lockable cabinet with 4x removable AV trays, offering simple storage and population of small-form devices.

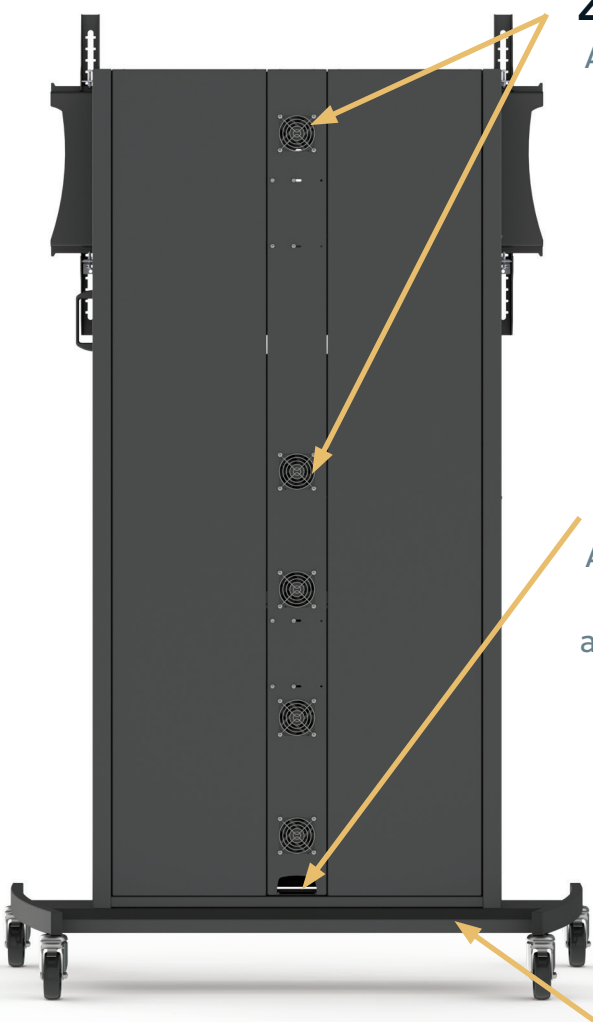


Zonal Air Circulation.

Automatic air circulation around your screen and stored AV devices ensures uninterrupted performance.

Discreet Cable Management.

All cabling can be neatly hidden within the mast and connected to screen and power via the cable exit points.



Custom Cabinet Finishes.

Blend the Rhobus Plus into your offices by choosing from a range of bespoke finishes including Oak, Beech, Walnut and Grey wood options.

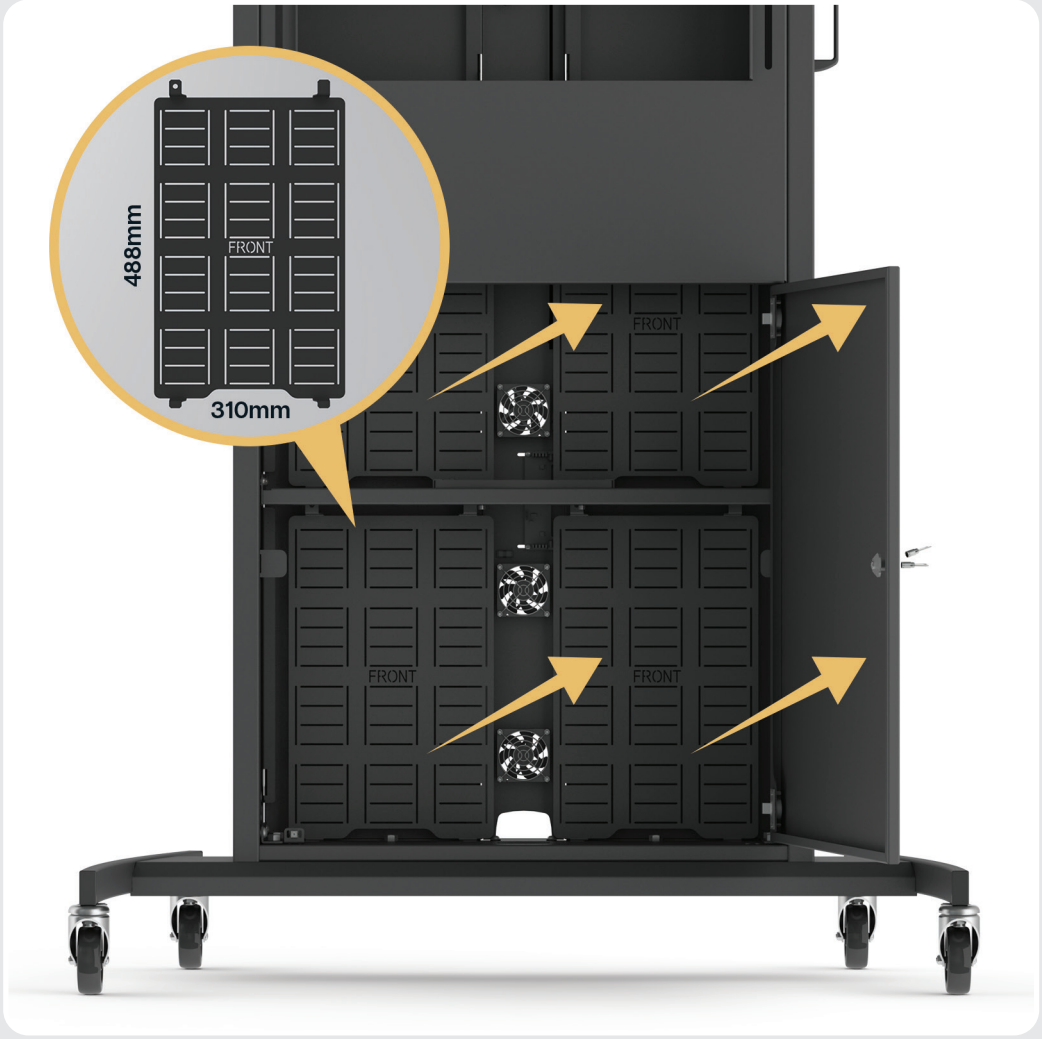
Range of Installation Types.

Readily available as a mobile trolley, bolt down stand or floor-to-wall variations. Twin screen and custom versions are available upon request.

Maintenance and Installer Friendly Design.

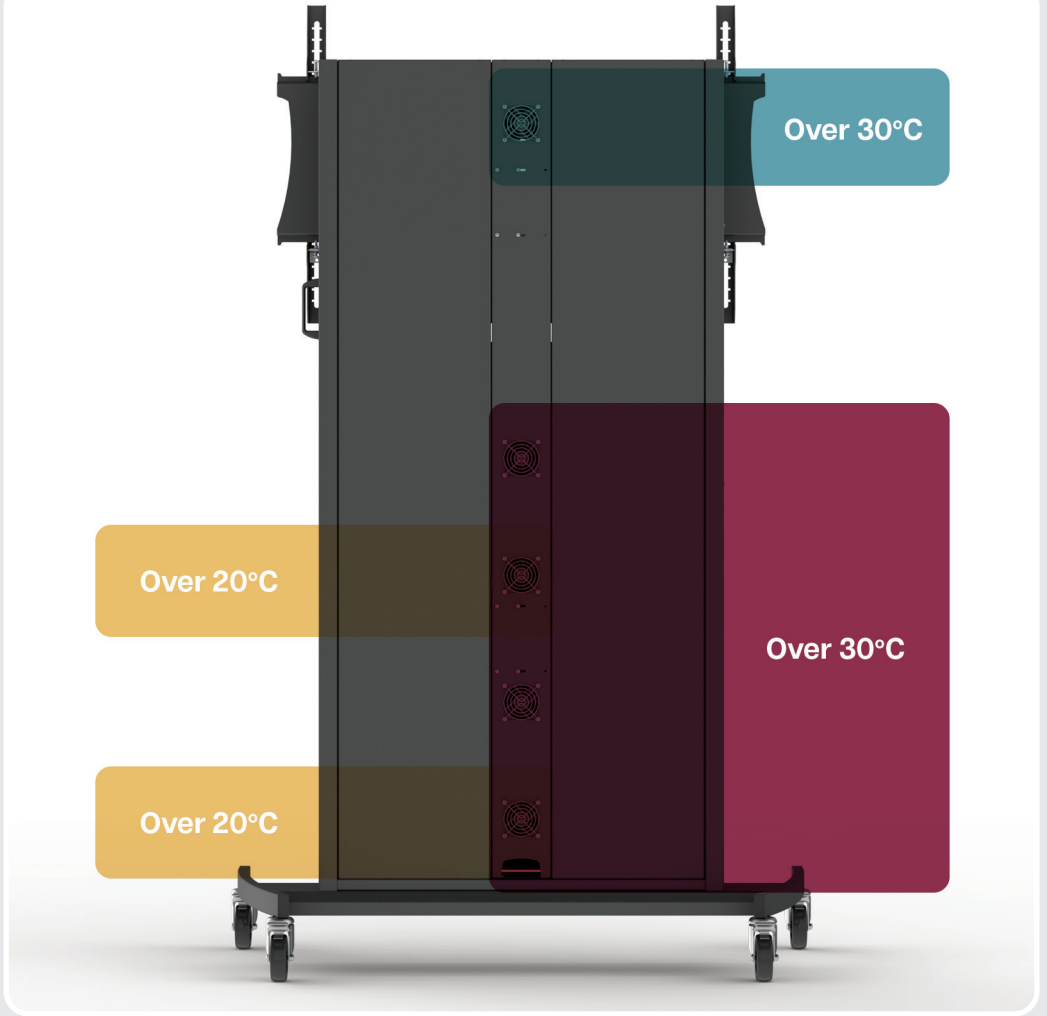
Featuring an integrated lockable cabinet, this solution provides secure and practical storage for up to four removable AV trays, making maintenance simple and efficient while also allowing devices to be pre-populated in advance for faster installation and setup.

Each tray measures 488 x 310mm, offering generous space for a wide range of small-form equipment, while the overall design ensures tidy organisation, easy access, and streamlined system management.



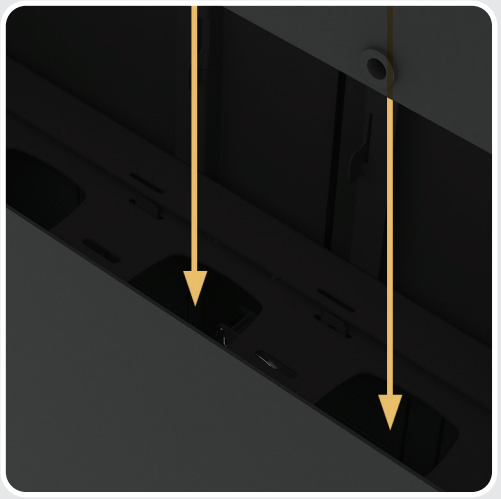
Keeping Cool Under Pressure: Zonal Air Circulation Keeps Internal Equipment Operating Efficiently.

Designed to maintain peak performance, the zonal air circulation system keeps internal equipment cool and operating efficiently at all times. Fans activate automatically once pre-determined temperature thresholds are reached, helping to protect valuable AV components and ensure reliable operation. With adjustable temperature settings, the system can be tailored to specific device requirements, allowing you to optimise performance and support long-term equipment longevity.



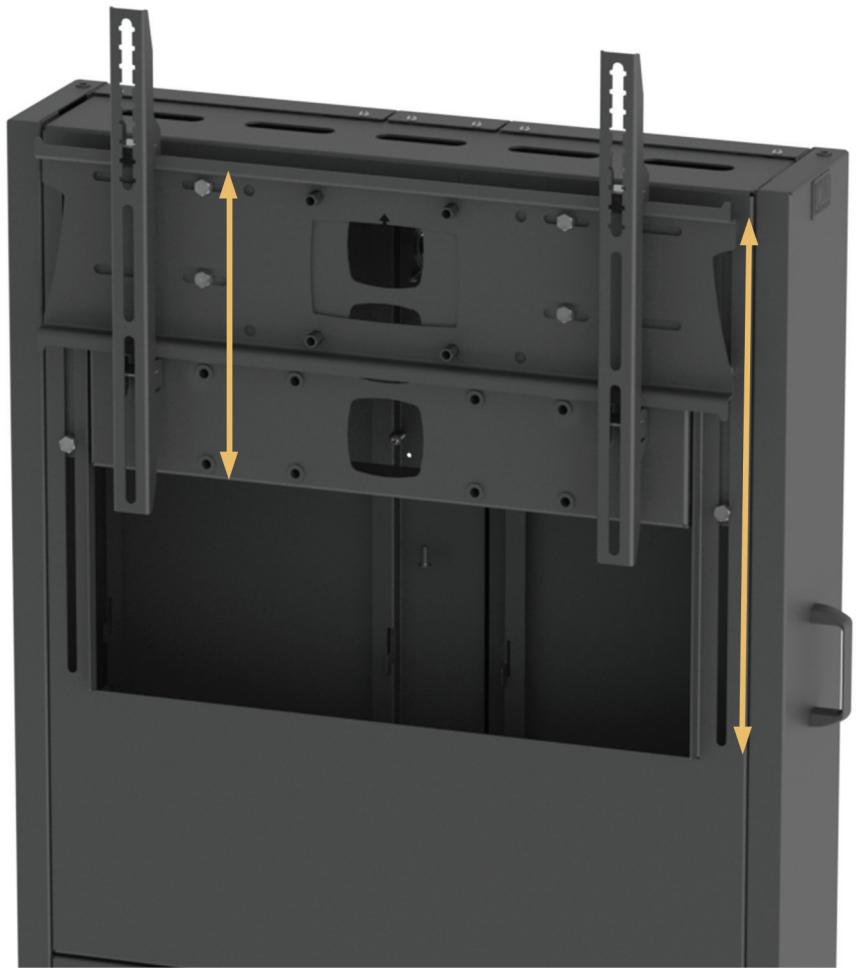
Tidy Cable Management Route With Integrated 4-Way Power Socket.

Designed for a clean, professional finish, integrated cable management within the mast keeps wiring neatly concealed and protected, reducing visual clutter and improving overall installation aesthetics. An integrated 4-way power socket enables simple, centralised connectivity for multiple devices, while top and bottom cable exit points allow for straightforward routing between the screen and wall-mounted power or data outlets, ensuring a tidy and efficient setup.



Adjustable Screen Height for Optimal Viewing & VC Placement.

Designed for flexibility and comfort, this solution features screen height adjustment to support a wide range of screen sizes while ensuring optimal positioning for every user. It also provides ideal placement for video conference cameras, helping create a more professional, ergonomic, and visually balanced workspace—perfect for modern hybrid and collaborative environments.



Dedicated Video Conference Mounts Suitable for Every Installation.

Each Rhobus Plus solution, whether standard or heavy-duty, is compatible with our video conference range of mounts. Offering wide ranging compatibility for your choice of video conference device. Devices can be mounted above and/or below the screen, ensuring that each solution caters to the needs of each installation.

Standardised Versions with Wide Ranging Customisation Opportunities.

The Rhobus Plus Trolley is available in UNICOL's signature Sinterflex White or Sinterflex Black with an all metal cabinet door as standard.

UNICOL prides themselves on their flexibility and customisation options, allowing you to make each mount your own. Bespoke RAL colours, alternative wooden shelf finises or the addition of your logo can be accommodated. Enquire for more information.

Looking to match your brand guidelines? We can custom finish your product in any RAL colour.

Custom wood finishes are available including Oak, Beech, Walnut and Grey wood options.

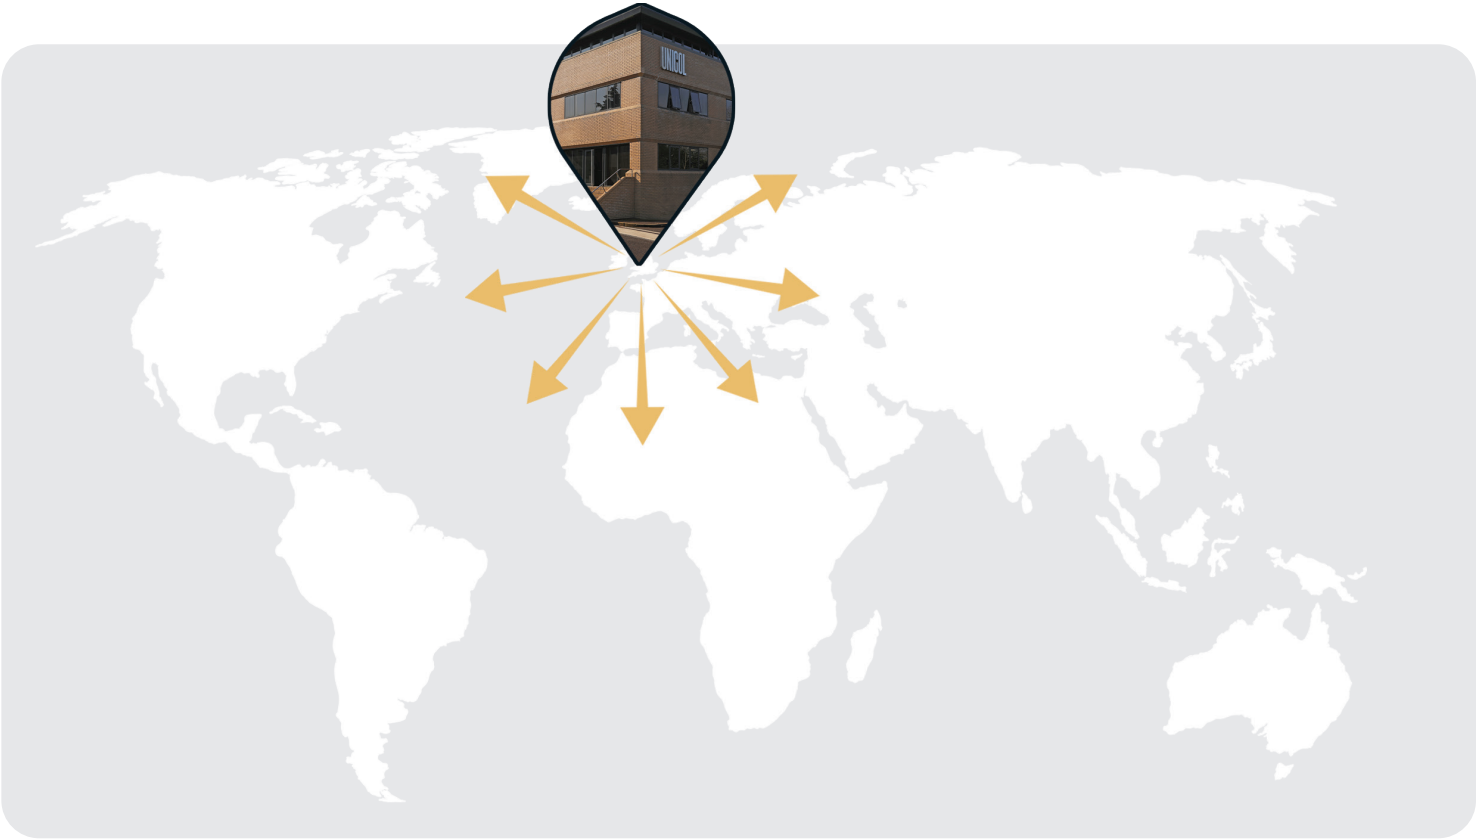
Designed, Manufactured & Dispatched in the UK, Distributed Worldwide.

Our purpose-built 45,000sqft Oxford factory enables us to be entrusted with large projects, yet with the flexibility to daily despatch routine orders and one-off custom items. Here, all the design, testing and manufacturing processes work seamlessly together to maintain UNICOL's principle of innovating robust, versatile and dependable mounting solutions.



Over 60 Years of Innovation and our Continued Values That Stand the Test of Time.

At UNICOL, we endeavour to continue designing and manufacturing, innovative, high quality AV mount solutions that satisfy the demands of the true AV professional.

We want you to be fully supported in all your AV mounting needs so guarantee:

- Rapid turnaround on standard products.
- Over 60 years of knowledge & expertise.
- UK design and manufacturing.
- 98% recyclable products and packaging.
- 10 year design & manufacture warranty.
- Efficient designing, offering modular products that are easy to configure and adapt.
- Products are manufactured using high quality British steel.
- Custom, one-off product designs available.

Rapid Turnaround on Standard Products.

In-house manufacturing expertise ensures we can offer the shortest possible turnaround timescales.

Environmentally Conscious.

Made in-house with British steel. Scrap metal is recycled. Shipped in heavy-duty paper or cardboard packaging.

10 Year Design & Manufacture Warranty.

Our warranties guarantee product longevity, reliability, and peace of mind for any installation.

In-House Design & Manufacturing.

This allows us to offer rapid turnaround, design flexibility and custom one-off solutions
